The quiet dangers of a car accident:

- ▶ Whiplash injuries can occur in accidents at speeds as low as 5 miles per hour.
- ▶ Because your body is very good at compensating for injuries you may have damage without pain.
- ▶ Whiplash symptoms are often subtle and include difficulty concentrating, difficulty sleeping and unusual fatigue.
- ▶ It can take weeks or even months for the full spectrum of injuries to manifest if left untreated.
- ▶ By the time the serious symptoms of whiplash begin to manifest it can be too late to fully reverse the damage to your body.
- ▶ Whiplash injuries originate in the soft tissue of the neck and shoulders, so typical examinations following a car accident will not detect these injuries.
- ▶ Most doctors aren't trained to look for hidden injuries - they'll only test or look for injuries that are causing symptoms at the moment of the exam.

If you are in a car accident:

- ▶ Call to schedule a free exam as soon as possible. Making sure you aren't injured should be your first priority!
- ▶ Our free exam will check for the soft tissue damage that most conventional medical exams may miss.
- ▶ If treatment is necessary we will help walk you through the steps to approve treatment through your car insurance and make the process as easy and stress free as possible.

If you have been in an accident in the past that was left untreated:

- ▶ Make sure to mention the accident to the office during your next exam.
- ▶ If necessary we will contact the relevant insurance companies to ensure you get the lowest cost care possible.

Our goal is to get you back to the shape you were in before your accident. An auto accident shouldn't be the reason you aren't able to enjoy everyday life!

Meet Dr. Cutitta

Dr. Cutitta has been practicing chiropractic care since 2004. After seeing how chiropractic care helped his parents, he wanted to provide the same care to his own patients. He is committed to providing excellent care and helping his patients achieve optimal health and well-being.

Through years of experience, Dr. Cutitta can pinpoint the source of a patient's pain. "We can pretty much treat every joint in the body - head to toe". Though his primary complaints are headaches and backaches, Cutitta Chiropractic has treated patients with injuries and pain in all areas of the body.

Our office

In addition to providing excellent care, our office is dedicated to helping in the local community. Through continued community outreach, including lectures, pamper events and fundraising opportunities, he tries to give back as much as he receives.

If you have any questions for our office, don't hesitate to ask us! We always want to keep communication open between ourselves and our patients, and genuinely care about every question we receive

What do do if you have been in an accident

Before you Drive

- ▶ Visit our web site at www.cutittachiro.com/accidentkit.html for a list of resources and items to have on hand in the event of an accident

At the Accident Scene

- ▶ Remain Calm & Stop your Car
- ▶ If you are blocking traffic in a dangerous place, pull off to the side of the road or into a well lit parking lot
- ▶ Turn off your vehicle's engine and either wait for assistance, or if it is safe step out of your car.
- ▶ Check to see if you or any passengers with you are injured
- ▶ Call the Police (Request an EMT if there are injuries)
- ▶ Do not admit fault at any point or discuss the details of the accident.
 - ▶ Be courteous and tactful to all parties involved
 - ▶ Exchange information with all drivers (vehicle registration #, VIN #, driver's name, license number, insurance company and policy number)
 - ▶ Answer police questions calmly, only once you've had a moment to collect your thoughts
 - ▶ Take pictures of everything involved in the accident
 - ▶ Assist police, where requested, with their official report
 - ▶ Note the name and badge # of the responding officer
 - ▶ Get a copy of the police report or case #

After the Accident

- ▶ Report the accident promptly to your insurance agent
- ▶ Do not drive your car if it is unsafe.
- ▶ Call our office at your earliest convenience to schedule a complimentary checkup to ensure you are free of any soft tissue damage or whiplash injuries.
